Sponsored Projects Maintenance Schedule
### NEW AWARD CHECKLIST

1. Make sure the award is as expected. Review the SAA for the project’s overall period of performance and funding as well as the current budget period and funding.

2. Review Award Notice for “patches.” Annotate, as appropriate, in your preferred portfolio management tool:
   - Budgetary restrictions
   - Prior approval requirements
   - Equipment Ownership
   - Special terms and/or additional administrative work
   - Carry forward restrictions
   - Special reporting requirements
   - Special invoicing requirements

3. Complete New PTA transaction
   - Co-PI Tasks: As needed, identify task manager, task org code, and determine budget allocation for Co-Investigator task(s), and add them as part of the new PTA setup.
   - Create additional tasks for certain project activities described here.

4. Meet with PI(s). Discuss and confirm with PI(s) who and/or what will be charged to the project:
   - Review commitments and verify they can still be met:
     1. PI & Key Personnel Effort. Review effort commitments of project personnel and verify they can still be met. Re-evaluate effort commitments will need to be revised, initiate sponsor price approvals, as required by the terms and conditions of the award.
     2. Cost sharing (if applicable). Confirm any committed cash and/or in-kind cost sharing is still available to be leveraged for the project.

5. Setup Award for Use - In appropriate systems (as applicable):
   - Labor Scheduler - Create/update Labor Distributions for faculty, staff, and contingent employees.
   - Graduate Financial Support system (GFS) - Create/update assistantship appointments for graduate students and Postdoctoral Scholars.
   - iProcurement: Initiate and submit Subaward requisition.
   - iProcurement: Initiate and submit new requisition.
   - iProcurement: Initiate and submit change orders for any blanket POs that should be charged to the new PTA. Please note, depending on the circumstances, you may need to indicate you want to both close an existing open line on a PO in addition to adding a new one when submitting a change order request.
   - Service Centers: For each SU service center that will be utilized, complete the appropriate billing form to indicate the new PTA to charge.

6. Set Up the award for use - Cost Sharing. As applicable, as a best practice, request transfer of funds to cost sharing PO(s) for committed cost sharing being funded from gift, endowment, and designated funds. Cost share funding coming from operating budgets is typically transferred near the end of each Stanford fiscal year.

7. Set Up the award for use - Fabrication. As applicable, request for a fabrication number by completing the form “Fabrication Request Form.” Submit form and supporting documents to Property Management Office (PMO). Include a specific bill of materials and dimensioned drawing showing locations of all components. PMO will review the request and assign Fabrication Number. Once the department has reviewed this it can request the set up of a fabrication account using the provided fabrication number as the task number, linked to the established award and a unique capital project.
Project Maintenance for the Life of the Award

Perform the necessary maintenance. Keep that car running smoothly, and it will take you where you need to go!

**Monthly**
(Fill up the tank, vacuum, wash and wax)

- Confirm what you set up actually occurred
